

#### OC299720

### **CAMERA SENSORS** •

Camera sensors are used to simultaneously check various properties of objects (e.g., completeness, dimensional accuracy, position, damages, labeling). This takes place independent of the component position virtually in real time. Camera sensors are image processing systems that combine image sensor and image processing computer with image processing software in a metal housing. Depending on the version, lens and illumination unit are also integrated in the housing or must be additionally mounted. The camera sensors are set using an intuitive software program. On the device, object-specific check programs can be stored that contain the respective feature checks. These programs can be activated depending on the object that is to be inspected. The rugged housing design makes possible use under harsh environmental conditions.

### **MECHANICAL FEATURES**

| Ambient temperature (MAX) | 50 °C               |
|---------------------------|---------------------|
| Housing coating           | With powder coating |
| Housing material          | Aluminum            |
| Sensor height             | 29 mm               |
| Sensor length             | 29.3 mm             |
| Sensor width              | 29 mm               |

### **ELECTRICAL FEATURES**

| ELECTRICAL FEATURES                              |                           |
|--|---------------------------|
| For interchangeable lens (C-mount)               | +                         |
| Input voltage at DC                              | 4.45 V 5.5 V              |
| Measuring time for high speed                    | 750 fps                   |
| No-load current                                  | 300 mA                    |
| Number of digital inputs                         | 1                         |
| Number of digital outputs                        | 1                         |
| Number of pins                                   | 10                        |
| Number of pins of the communication interface    | 5                         |
| Number of switching outputs                      | 1                         |
| Operating voltage                                | 4.45 V 5.5 V              |
| Power consumption                                | 3 W                       |
| Property picture system                          | Black and white           |
| Setting procedure                                | Application software      |
| Type of communication interface                  | USB 3.0 Micro-B           |
| Type of electrical connection                    | USB 3.0 Micro-B           |
| Type of plug-in contact, communication interface | Male (plug)               |
| Type of switching function                       | Programmable/configurable |
| Type of switching output                         | Optocoupler               |
| With RS485                                       | -                         |
|  |                           |

### **OPTICAL FEATURES**

| Resolution               | 640x480    |
|--------------------------|------------|
| Focal distance           | Variable   |
| Image recorder           | CMOS(1/3") |
| Geometry of edge contour | -          |

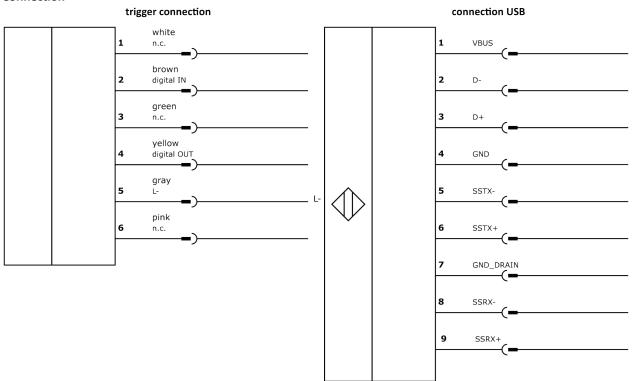

## **OTHER FEATURES**

| Air humidity         | 20 80% noncondensing  |
|----------------------|-----------------------|
| Other                |                       |
| Packaging dimensions | 99.0mm x 60mm x 160mm |
| Shipping weight      | 0.16kg                |
| Tariff code          | 90314990              |
|                      |                       |
| Classification       |                       |
| inf product group    | 715                   |

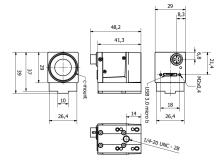

| ipf product group | 715      |
|-------------------|----------|
| eClass 8.0        | 27310201 |
| eClass 9.0        | 27310201 |
| eClass 9.1        | 27310201 |
| ETIM-5.0          | EC001511 |
| ETIM-6.0          | EC001511 |
| ETIM-7.0          | EC001511 |

## Connection

### **Dimensional drawing**

### Installation

Mounting / installation may only be carried out by a qualified electrician!

# Disposal

#### Software

Please download the software or driver required for operating your new device on our homepage: www.ipf.de

## **Safety warnings**

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information. Never use these devices in applications where the safety of a person depends on their functionality.

LED lighting systems can generate intensive UV radiation, which can damage your eyes in case of improper use. The manufacturer cannot be held responsible for damages that result from improper use or connection.
